Hi Larry.

i did some more research on TCE/PCE. both are actually used in some commercial degreasing agents/systems. I found a host of information regarding chlorinated degreasers but nothing specific to the exact industries (ie: gas stations) that will use them. I know many new (pep boys variety) brake cleaners are "chlorinated free" i did find one article saying that PCE was used in brake cleaning though. both products seem to be parallel in uses as degreasers. see the link below:
<http://www.grecobrothers.com/chlorin.htm>

I also checked on the owners of 5901 eastern ave
the names I have are consistant with what house of kleen has. [REDACTED]
i have their address as
[REDACTED]
[REDACTED]

that's where the access agreement was sent.

any quesitons. please call me at 610-364-2127

thanks

myles

attached are my photos of the site visit. (actaully there are 3 sets of photos in a total of 3 emails) <<house of kleen 1.zip>>
